

### Highlights

- Die-molded silicone logo / emblem option for a modern, upgraded look
- Premium dimensional branding upgrade for sports, school and workwear uniforms
- Thin, light decoration option with a rubberized feel that bends and moves with wearer and can embellish lighter, sportswear fabrics without puckering

### Features & Benefits

- Upgraded modern look with dimension - a step-up from plastisol and flat transfers
- Sportswear look & feel with outstanding durability
- Goldilocks thickness (just right) - provides a rubberized, matte look but moves flexibly on lighter weight fabrics
- Resists cracking with movement and wear
- Fine detail reproduction
- No bleed through - great option for dye-sublimated uniform designs
- Higher perceived value versus flat screen prints and DTF transfers - no puckering with modern sportswear fabrics
- Exceptional wash durability when applied consistent with provided instructions
- Sharp edge definition and clean look
- Accommodates logos up to 10" x 9"

### Colors

Up to 6 colors per logo\*  
\*Pantone® color matching  
available of solid,uncoated colors
